OUR SERVICES

Web Designing

We make exact website designs that will attract possibility customers to your industry supporting to future enlargement and gain fullness. The design draws the visual aspect of a site. Generally, the design consolidates discriminate, shading, balance, accentuation, mood, component's.

CMS WEB DEVELOPMENT

CMS stand for "Content Management System" which is helping for maintaining that website by using any authenticate End-User(Client). It's safe to say that nearly every website that's up-to-date these days is using some form of content management system (CMS). While there are a ton of great free options that provide us with a CMS to power a website (WordPress, Drupal, etc.), it doesn't hurt to peek under the hood and get a feel for how these systems work.

E-commerce

Your Ecommerce website does not have the luxury to slow down by even one second as busy and internet savvy consumers seek quick results that do not compromise on their Ecommerce experience. At Shrisaitech, we can create a domain-specific retail architecture that merges current trends with clean coding to ensure eye-grabbing user experiences for maximizing conversions. Whether you're looking to optimize your current site or you need our website Design Services to build a new one from scratch, our development team will help you move in the right direction.

DEVELOPMENT PROCESS

There are certain key design features that will be built into the overall design and each will need to be approved by the client before the final design is accepted. Those features are:

- **Navigation** :It is particularly important to create a navigational system that is available on every page, maintains the overall feel of the site while making the site intuitive and easy to locate data and information
- **Colors**: The design will be built around a coordinated color palette that will provide the professional yet simple look. While maintaining the cohesiveness of the website.
- **Fonts**: The fonts' family, size and color combine to maintain a professional and cohesive feel.

- **Images:** Photos, graphics and individual images will be submitted by the client and may be modified in the appropriate software to meet the overall design requirements of the site. All photos/graphics must be supplied by Client or stock photos without copyright protection can be used.

TECHNOLOGIES

Which technology will be used to design and develop your project will be decided after a research on your complete requirement. Though here is the list of technologies we use to design and develop the project.

- PHP (Code Igniter Framework)
- HTML/HTML5
- Bootstrap
- CSS
- AJAX
- Java Script
- jQuery
- MySQL (Database)
- Opencart
- Wordpress
- Magento
